K. Mackenzie

Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) K. Mackenzie

This book provides a striking synthesis of the standard theory of connections in principal bundles and the Lie theory of Lie groupoids. The concept of Lie groupoid is a little-known formulation of the concept of principal bundle and corresponding to the Lie algebra of a Lie group is the concept of Lie algebroid: in principal bundle terms this is the Atiyah sequence. The author's viewpoint is that certain deep problems in connection theory are best addressed by groupoid and Lie algebroid methods. After preliminary chapters on topological groupoids, the author gives the first unified and detailed account of the theory of Lie groupoids and Lie algebroids. He then applies this theory to the cohomology of Lie algebroids, re-interpreting connection theory in cohomological terms, and giving criteria for the existence of (not necessarily Riemannian) connections with prescribed curvature form. This material, presented in the last two chapters, is work of the author published here for the first time. This book will be of interest to differential geometers working in general connection theory and to researchers in theoretical physics and other fields who make use of connection theory.

From reader reviews:

Ross Jackson:

This Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) book is not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is usually information inside this guide incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. That Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) without we understand teach the one who reading it become critical in pondering and analyzing. Don't always be worry Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) can bring when you are and not make your tote space or bookshelves' turn into full because you can have it inside your lovely laptop even cell phone. This Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) having great arrangement in word in addition to layout, so you will not experience uninterested in reading.

Guadalupe Marshall:

Nowadays reading books be than want or need but also become a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The information you get based on what kind of guide you read, if you want drive more knowledge just go with education books but if you want experience happy read one with theme for entertaining for instance comic or novel. Often the Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) is kind of e-book which is giving the reader erratic experience.

Katie Harper:

Reading a publication tends to be new life style within this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can easily share their idea. Publications can also inspire a lot of people. A lot of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the textbooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their expertise in writing, they also doing some exploration before they write to their book. One of them is this Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series).

Tim Gonzalez:

Guide is one of source of know-how. We can add our expertise from it. Not only for students but also native or citizen need book to know the update information of year for you to year. As we know those guides have

many advantages. Beside all of us add our knowledge, can bring us to around the world. From the book Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series) we can consider more advantage. Don't one to be creative people? Being creative person must love to read a book. Only choose the best book that appropriate with your aim. Don't possibly be doubt to change your life with that book Lie Groupoids and Lie Algebroids in Differential Geometry (London Mathematical Society Lecture Note Series). You can more desirable than now.
