Chemical Kinetics: From Molecular Structure to Chemical Reactivity

Luis G Arnaut, Sebastiao Jose Formosinho, Hugh Burrows

Chemical Kinetics: From Molecular Structure to Chemical Reactivity Luis G Arnaut, Sebastiao Jose Formosinho, Hugh Burrows

Chemical Kinetics bridges the gap between beginner and specialist with a path that leads the reader from the phenomenological approach to the rates of chemical reactions to the state-of-the-art calculation of the rate constants of the most prevalent reactions: atom transfers, catalysis, proton transfers, substitution reactions, energy transfers and electron transfers. For the beginner provides the basics: the simplest concepts, the fundamental experiments, and the underlying theories. For the specialist shows where sophisticated experimental and theoretical methods combine to offer a panorama of time-dependent molecular phenomena connected by a new rational.

Chemical Kinetics goes far beyond the qualitative description: with the guidance of theory, the path becomes a reaction path that can actually be inspected and calculated. But Chemical Kinetics is more about structure and reactivity than numbers and calculations. A great emphasis in the clarity of the concepts is achieved by illustrating all the theories and mechanisms with recent examples, some of them described with sufficient detail and simplicity to be used in general chemistry and lab courses.

- * Looking at atoms and molecules, and how molecular structures change with time.
- * Providing practical examples and detailed theoretical calculations
- * Of special interest to Industrial Chemistry and Biochemistry

From reader reviews:

Christopher Forney:

In this 21st centuries, people become competitive in each and every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Sure, by reading a publication your ability to survive improve then having chance to endure than other is high. For you personally who want to start reading a book, we give you this kind of Chemical Kinetics: From Molecular Structure to Chemical Reactivity book as basic and daily reading e-book. Why, because this book is usually more than just a book.

Joseph Cole:

This book untitled Chemical Kinetics: From Molecular Structure to Chemical Reactivity to be one of several books in which best seller in this year, here is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this kind of book in the book retail store or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Smartphone. So there is no reason to your account to past this reserve from your list.

Betty Bass:

The book Chemical Kinetics: From Molecular Structure to Chemical Reactivity will bring that you the new experience of reading any book. The author style to elucidate the idea is very unique. If you try to find new book to see, this book very suitable to you. The book Chemical Kinetics: From Molecular Structure to Chemical Reactivity is much recommended to you you just read. You can also get the e-book from official web site, so you can more easily to read the book.

Christopher Evan:

In this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple way to have that. What you must do is just spending your time little but quite enough to possess a look at some books. One of many books in the top listing in your reading list is definitely Chemical Kinetics: From Molecular Structure to Chemical Reactivity. This book and that is qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking upward and review this e-book you can get many advantages.
