Technologies and Innovations for Development: Scientific Cooperation for a Sustainable Future

Technologies and Innovations for Development: Scientific Cooperation for a Sustainable Future

Technological innovation – combined with scientific research – has always constituted a driving force of transformation in our societies. At the same time, it is no longer simply possible to transfer technologies from the North to the South; it is also essential to consider technical innovations that are adapted to the social, environmental, cultural and economic conditions of receiving countries, and which can be appropriated by their potential users and as such prove to be real technologies for fostering development.

The first International Scientific Conference on the topic organized by the UNESCO Chair Technologies for Development at the Ecole Polytechnique Fédérale de Lausanne in 2010 focused on its four priority sectors: Technologies for Sustainable Development of Habitat and Cities, ICTs for the Environment, Science and Technology for Disaster Risk Reduction, and Technologies for the Production of Sustainable Energy.

This volume reflects the main outcomes of the conference and provides some significant orientation and success criteria for the effective implementation and use of innovative technologies, their aims, their particular applications in the context of developing countries, their accessibility for users, and their appropriation by producers and stakeholders in the field of development both in the North and South, thus ensuring their sustainability. This kind of scientific cooperation also highlights the added values for northern researchers in sharing their knowledge and know-how, leading to a real win-win partnership.

The authors gathered within this book include representatives from academic and research institutions and other organizations from diverse countries and offer a significant synergy of competences, approaches and disciplines.

Third, you are able to share your knowledge to some others. When you read this Technologies and Innovations for Development: Scientific Cooperation for a Sustainable Future, you can tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

Frank Tye:

You are able to spend your free time to study this book this publication. This Technologies and Innovations for Development: Scientific Cooperation for a Sustainable Future is simple to create you can read it in the recreation area, in the beach, train as well as soon. If you did not include much space to bring often the printed book, you can buy the e-book. It is make you quicker to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Charles Parker:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their interest. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that looking at is not important, boring as well as can't see

colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Technologies and Innovations for Development: Scientific Cooperation for a Sustainable Future can make you really feel more interested to read.
