Innovation in Aeronautics (Woodhead Publishing in Materials)

Innovation in Aeronautics (Woodhead Publishing in Materials)

Innovation in aerospace design and engineering is essential to meet the many challenges facing this sector. Innovation in aeronautics explores both a range of innovative ideas and how the process of innovation itself can be effectively managed.

After an introduction to innovation in aeronautics, part one reviews developments including biologically-inspired technologies, morphing aerodynamic concepts, jet engine design drivers, and developments underpinned by digital technologies. The environment and human factors in innovation are also explored as are trends in supersonic passenger air travel. Part two goes on to examine change and the processes and management involved in innovative technology development. Challenges faced in aeronautical production are the focus of part three, which reviews topics such as intellectual property and patents, risk mitigation and the use of lean engineering. Finally, part four examines key issues in what makes for successful innovation in this sector.

With its distinguished editors and international team of expert contributors, Innovation in aeronautics is an essential guide for all those involved in the design and engineering of aerospace structures and systems.

- Explores a range of innovative aerospace design ideas
- Discusses how the process of innovation itself can be effectively managed
- Reviews developments including biologically-inspired technologies, morphing aerodynamic concepts, jet engine design drivers and developments underpinned by digital technologies

From reader reviews:

Joe Vizcarra:

What do you concentrate on book? It is just for students because they're still students or the idea for all people in the world, what best subject for that? Only you can be answered for that concern above. Every person has several personality and hobby for every other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book Innovation in Aeronautics (Woodhead Publishing in Materials). All type of book is it possible to see on many resources. You can look for the internet solutions or other social media.

Timothy Hardy:

This Innovation in Aeronautics (Woodhead Publishing in Materials) tend to be reliable for you who want to be described as a successful person, why. The reason of this Innovation in Aeronautics (Woodhead Publishing in Materials) can be one of many great books you must have is definitely giving you more than just simple reading food but feed a person with information that maybe will shock your previous knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed ones. Beside that this Innovation in Aeronautics (Woodhead Publishing in Materials) forcing you to have an enormous of experience for example rich vocabulary, giving you test of critical thinking that we know it useful in your day exercise. So , let's have it and luxuriate in reading.

Sandra Earnhardt:

Is it you actually who having spare time and then spend it whole day by simply watching television programs or just laying on the bed? Do you need something new? This Innovation in Aeronautics (Woodhead Publishing in Materials) can be the response, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?

Meghan Drucker:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from your book. Book is created or printed or outlined from each source that filled update of news. On this modern era like today, many ways to get information are available for anyone. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Innovation in Aeronautics (Woodhead Publishing in Materials) when you essential it?
