Although the adoption of market reforms has been a key factor leading to China's recent economic growth, China continues to be governed by a communist party and has a socialist-influenced legal system. Vietnam, starting later, also with a socialist-influenced legal system, has followed a similar reform path, and other countries too are now looking towards China and Vietnam as models for development. This book provides a comprehensive, comparative assessment of legal developments in China and Vietnam, examining similarities and differences, and raising important questions such as: Is there a distinctive Chinese model, and/or a more general East Asian Model? If so, can it be flexibly applied to social and economic conditions in different countries? If it cannot be applied to a culturally and politically similar country like Vietnam, is the model transportable elsewhere in the world? Combining 'micro' or interpretive methods with 'macro' or structural traditions, the book provides a nuanced account of legal reforms in China and Vietnam, highlighting the factors likely to promote, change or resist the spread of the Chinese model.
