Biocentrismo (La cultura) (Italian Edition) Robert Lanza, Bob Berman

Il Novecento è stato il secolo della fisica. Le scoperte sull'atomo, le sue particelle e l'architettura del cosmo hanno prodotto la nostra concezione di universo e tutta la tecnologia che plasma la vita quotidiana. Eppure, proprio la fisica non è stata capace, e non lo è ancora, di rispondere alle antichissime domande dell'uomo, invocando come risolutiva quella teoria del tutto che ha a lungo inseguito e mai raggiunto. Che cosa c'era prima del Big Bang? Perché l'universo sembra costruito perfettamente su misura per l'uomo? E se chiudiamo gli occhi, l'universo esiste ancora? Esistono lo spazio e il tempo? Che cosa succede dopo la morte? Biocentrismo accoglie queste domande in una prospettiva inedita e affida alla biologia l'onere di far progredire le risposte: ciò che percepiamo come realtà non è che un prodotto della coscienza, scoperte scientifiche incluse. È la creatura biologica a modellare il racconto. Soltanto quando la materia diviene cosciente di sé e comincia a osservare l'esistente, l'universo intero muta la propria natura dallo stato indeterminato di probabilità – così come definito dalla teoria quantistica – a quello di misteriosa, concreta presenza: a partire dal fotone, dal petalo di una margherita, dal vento, per arrivare alle nebulose più remote. Robert Lanza – uno dei maggiori scienziati viventi, noto per le sue ricerche sulle cellule staminali – allestisce un'originale trattazione scientifica che ha la luce della semplicità e formula una teoria che colma un vuoto, oltraggiosa sia nei confronti della religione che della scienza. Una teoria che ha la necessaria e smisurata ambizione di porre la domanda: che cosa è l'universo?
