**Pulsed Neural Networks (MIT Press)** Wolfgang Maass, Christopher M. Bishop

Most practical applications of artificial neural networks are based on a computational model involving the propagation of continuous variables from one processing unit to the next. In recent years, data from neurobiological experiments have made it increasingly clear that biological neural networks, which communicate through pulses, use the timing of the pulses to transmit information and perform computation. This realization has stimulated significant research on pulsed neural networks, including theoretical analyses and model development, neurobiological modeling, and hardware implementation. This book presents the complete spectrum of current research in pulsed neural networks and includes the most important work from many of the key scientists in the field. Terrence J. Sejnowski's foreword, "Neural Pulse Coding," presents an overview of the topic. The first half of the book consists of longer tutorial articles spanning neurobiology, theory, algorithms, and hardware. The second half contains a larger number of shorter research chapters that present more advanced concepts. The contributors use consistent notation and terminology throughout the book. Contributors: Peter S. Burge, Stephen R. Deiss, Rodney J. Douglas, John G. Elias, Wulfram Gerstner, Alister Hamilton, David Horn, Axel Jahnke, Richard Kempter, Wolfgang Maass, Alessandro Mortara, Alan F. Murray, David P. M. Northmore, Irit Opher, Kostas A. Papathanasiou, Michael Recce, Barry J. P. Rising, Ulrich Roth, Tim Schönauer, Terrence J. Sejnowski, John Shawe-Taylor, Max R. van Daalen, J. Leo van Hemmen, Philippe Venier, Hermann Wagner, Adrian M. Whatley, Anthony M. Zador.

### **From reader reviews:**

#### **Michael Chapman:**

Nowadays reading books be than want or need but also work as a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book which improve your knowledge and information. The info you get based on what kind of reserve you read, if you want have more knowledge just go with education books but if you want sense happy read one along with theme for entertaining for instance comic or novel. Typically the Pulsed Neural Networks (MIT Press) is kind of book which is giving the reader unstable experience.

#### **Nancy Fisher:**

Hey guys, do you desires to finds a new book to learn? May be the book with the subject Pulsed Neural Networks (MIT Press) suitable to you? The book was written by renowned writer in this era. The book untitled Pulsed Neural Networks (MIT Press) is the main one of several books that will everyone read now. This specific book was inspired many men and women in the world. When you read this guide you will enter the new shape that you ever know prior to. The author explained their plan in the simple way, consequently all of people can easily to be aware of the core of this publication. This book will give you a lots of information about this world now. To help you see the represented of the world with this book.

#### **Linda Bryant:**

Spent a free a chance to be fun activity to try and do! A lot of people spent their spare time with their family, or their friends. Usually they undertaking activity like watching television, planning to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book might be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the book untitled Pulsed Neural Networks (MIT Press) can be great book to read. May be it may be best activity to you.

#### **Ian Sharpless:**

Reading a e-book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is created or printed or created from each source which filled update of news. In this modern era like today, many ways to get information are available for you. From media social including newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just searching for the Pulsed Neural Networks (MIT Press) when you desired it?
