Extra Dimensions in Space and Time (Multiversal Journeys) Itzhak Bars, John Terning

In physics, the idea of extra spatial dimensions originates from Nordstöm's 5-dimensional vector theory in 1914, followed by Kaluza-Klein theory in 1921, in an effort to unify general relativity and electromagnetism in a 5 dimensional space-time (4 dimensions for space and 1 for time). Kaluza-Klein theory didn't generate enough interest with physicist for the next five decades, due to its problems with inconsistencies. With the advent of supergravity theory (the theory that unifies general relativity and supersymmetry theories) in late 1970's and eventually, string theories (1980s) and M-theory (1990s), the dimensions of space-time increased to 11 (10-space and 1-time dimension).

There are two main features in this book that differentiates it from other books written about extra dimensions: The first feature is the coverage of extra dimensions in time (Two Time physics), which has not been covered in earlier books about extra dimensions. All other books mainly cover extra spatial dimensions. The second feature deals with level of presentation. The material is presented in a non-technical language followed by additional sections (in the form of appendices or footnotes) that explain the basic equations and formulas in the theories. This feature is very attractive to readers who want to find out more about the theories involved beyond the basic description for a layperson. The text is designed for scientifically literate non-specialists who want to know the latest discoveries in theoretical physics in a non-technical language. Readers with basic undergraduate background in modern physics and quantum mechanics can easily understand the technical sections.

Part I starts with an overview of the Standard Model of particles and forces, notions of Einstein's special and general relativity, and the overall view of the universe from the Big Bang to the present epoch, and covers Two-Time physics. 2T-physics has worked correctly at all scales of physics, both macroscopic and microscopic, for which there is experimental data so far. In addition to revealing hidden information even in familiar "everyday" physics, it also makes testable predictions in lesser known physics regimes that could be analyzed at the energy scales of the Large Hadron Collider at CERN or in cosmological observations."

Part II of the book is focused on extra dimensions of space. It covers the following topics: The Popular View of Extra Dimensions, Einstein and the Fourth Dimension, Traditional Extra Dimensions, Einstein's Gravity, The Theory Formerly Known as String, Warped Extra Dimensions, and How Do We Look For Extra Dimensions?

From reader reviews:

Tonya Hooper:

Here thing why this kind of Extra Dimensions in Space and Time (Multiversal Journeys) are different and reputable to be yours. First of all reading through a book is good however it depends in the content than it which is the content is as delicious as food or not. Extra Dimensions in Space and Time (Multiversal Journeys) giving you information deeper and different ways, you can find any book out there but there is no guide that similar with Extra Dimensions in Space and Time (Multiversal Journeys). It gives you thrill reading journey, its open up your own eyes about the thing in which happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in area, café, or even in your technique home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Extra Dimensions in Space and Time (Multiversal Journeys) in e-book can be your alternate.

Marshall Jackson:

Do you have something that that suits you such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest the first is novel. Now, why not trying Extra Dimensions in Space and Time (Multiversal Journeys) that give your pleasure preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the opportunity for people to know world much better then how they react toward the world. It can't be claimed constantly that reading habit only for the geeky particular person but for all of you who wants to end up being success person. So , for all of you who want to start reading through as your good habit, you are able to pick Extra Dimensions in Space and Time (Multiversal Journeys) become your own personal starter.

Michele Stoney:

Don't be worry should you be afraid that this book will filled the space in your house, you could have it in e-book method, more simple and reachable. This specific Extra Dimensions in Space and Time (Multiversal Journeys) can give you a lot of close friends because by you investigating this one book you have matter that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This guide offer you information that maybe your friend doesn't realize, by knowing more than additional make you to be great people. So , why hesitate? Let us have Extra Dimensions in Space and Time (Multiversal Journeys).

Lawrence Abbate:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as reading become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to add you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. Numerous books

that can you choose to adopt be your object. One of them is actually Extra Dimensions in Space and Time (Multiversal Journeys).
