An invaluable guide for families embarking on the journey of educating their primary school-age children at home. One of the biggest challenges for homeschooling parents is to break away from the model of education they received in school and to re-educate themselves about Education, as the conventional classroom methodology is not the model of pedagogy (teaching) that works best in the homeschool scenario. This book offers tried-and-tested alternatives that will enrich and facilitate learning rather than hinder the process of educating young minds. Having been part of the first generation of South African homeschoolers, the author shares her knowledge, plus tips and advice she has learnt along the way, in order to help others make good choices and avoid common pitfalls and costly mistakes.
