Barrier-Free Design

James Holmes-Seidle

Barrier-Free Design James Holmes-Seidle

This book for architects, interior designers, building managers, students, conference organisers looks at first principles to provide the user with the 'tools' to make their own decisions rather than a 'cookbook' approach. It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects.

For the first time the book considers the needs of people with visual, hearing and mental disabilities, who make up the majority of disabled people in the population, alongside those of people with physical mobility disabilities. Practical low cost solutions to retro-fitting existing buildings are discussed, as well as the methods used to assess the suitability of an existing building, and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed - with full working technical drawings, and full specification details. These will reduce considerably the research time needed to produce a cost-effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries, and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.

From reader reviews:

John Drew:

What do you consider book? It is just for students since they're still students or this for all people in the world, what the best subject for that? Simply you can be answered for that problem above. Every person has different personality and hobby for each and every other. Don't to be forced someone or something that they don't want do that. You must know how great as well as important the book Barrier-Free Design. All type of book are you able to see on many options. You can look for the internet options or other social media.

Curtis Tyson:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge your information inside the book which improve your knowledge and information. The info you get based on what kind of publication you read, if you want get more knowledge just go with knowledge books but if you want experience happy read one having theme for entertaining for example comic or novel. The Barrier-Free Design is kind of publication which is giving the reader erratic experience.

Summer McGaugh:

Reading a book tends to be new life style with this era globalization. With studying you can get a lot of information which will give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. A lot of author can inspire all their reader with their story as well as their experience. Not only the storyline that share in the guides. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some study before they write with their book. One of them is this Barrier-Free Design.

Angela Joseph:

Typically the book Barrier-Free Design has a lot details on it. So when you make sure to read this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.
