El Planeta está enfermo: enfermo de complejidad. El mejor termómetro de esta complejidad creciente y exponencial está en las calles. Los paisajes urbanos se han convertido en un laboratorio móvil y cambiante donde poder comprobar de primera mano la dificultad que conlleva mantenerse en equilibrio sobre el alambre vital de nuestros tiempos. Desde el análisis de cuestiones aparentemente triviales o cotidianas, Patologías Urbanas pretende acercarse a las tendencias y cambios sociales de las últimas décadas y sus consecuencias sobre los individuos desde un punto de vista crítico; así como esbozar algunos de los rasgos que caracterizan nuestro presente.
