Algorithms to Live By: The Computer Science of Human Decisions Brian Christian, Tom Griffiths

A fascinating exploration of how insights from computer algorithms can be applied to our everyday lives, helping to solve common decision-making problems and illuminate the workings of the human mind

All our lives are constrained by limited space and time, limits that give rise to a particular set of problems. What should we do, or leave undone, in a day or a lifetime? How much messiness should we accept? What balance of new activities and familiar favorites is the most fulfilling? These may seem like uniquely human quandaries, but they are not: computers, too, face the same constraints, so computer scientists have been grappling with their version of such issues for decades. And the solutions they've found have much to teach us.

In a dazzlingly interdisciplinary work, acclaimed author Brian Christian and cognitive scientist Tom Griffiths show how the algorithms used by computers can also untangle very human questions. They explain how to have better hunches and when to leave things to chance, how to deal with overwhelming choices and how best to connect with others. From finding a spouse to finding a parking spot, from organizing one's inbox to understanding the workings of memory, *Algorithms to Live By* transforms the wisdom of computer science into strategies for human living.

From reader reviews:

Joanne Starks:

Here thing why this Algorithms to Live By: The Computer Science of Human Decisions are different and trusted to be yours. First of all examining a book is good but it depends in the content of it which is the content is as yummy as food or not. Algorithms to Live By: The Computer Science of Human Decisions giving you information deeper and in different ways, you can find any book out there but there is no book that similar with Algorithms to Live By: The Computer Science of Human Decisions. It gives you thrill looking at journey, its open up your own eyes about the thing this happened in the world which is possibly can be happened around you. You can actually bring everywhere like in playground, café, or even in your approach home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Algorithms to Live By: The Computer Science of Human Decisions in e-book can be your choice.

Stephen Beatty:

Spent a free time to be fun activity to complete! A lot of people spent their leisure time with their family, or their particular friends. Usually they performing activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your free time/ holiday? May be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to attempt look for book, may be the guide untitled Algorithms to Live By: The Computer Science of Human Decisions can be excellent book to read. May be it could be best activity to you.

Judith Craig:

Beside this kind of Algorithms to Live By: The Computer Science of Human Decisions in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you might got here is fresh from oven so don't become worry if you feel like an older people live in narrow small town. It is good thing to have Algorithms to Live By: The Computer Science of Human Decisions because this book offers to you personally readable information. Do you occasionally have book but you seldom get what it's interesting features of. Oh come on, that won't happen if you have this in your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Use you still want to miss the idea? Find this book as well as read it from currently!

Debera Jessie:

As a university student exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the professor want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this

age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Algorithms to Live By: The Computer Science of Human Decisions can make you really feel more interested to read.
