Spinning Flight

Ralph D. Lorenz

Spinning Flight Ralph D. Lorenz

More frisbees are sold each year than baseballs, basketballs and footballs combined. Yet these familiar flying objects have subtle and clever aerodynamic and gyrodynamic properties which are only recently being documented by wind tunnel and other studies. In common with other rotating bodies discussed in this readily accessible book, they are typically not treated in textbooks of aeronautics and the literature is scattered in a variety of places. This book develops the theme of disc-wings and spinning aerospace vehicles in parallel. Since many of the examples are recreational, anyone who enjoys these activities will likely find it profitable and enjoyable. In addition to spinning objects of various shapes, several exotic manned aircraft with disc planforms have been proposed and a prototypes built – these include a Nazi ‘secret weapon’ and the De Havilland Avrocar, also discussed in the book. Boomerangs represent another category of spinning aerodynamic body whose behavior can only be understood by coupling aerodynamics with gyrodynamics. The narrative, supported by equations and graphs, explains how the shape and throw of a boomerang relates to its trajectory. The natural world presents still other examples, namely the samaras or ‘seed-wings’ of many tree species, which autorotate during their descent, like a helicopter whose engine has failed. The flight performance of these spinning wings directly affects the dispersal and thus the evolutionary competitiveness of the trees concerned. Samara-type configurations are also considered for instrumentation and other payload dispersal applications. In short, the book discusses a range of familiar, connected, but largely undeveloped, topics in an accessible, but complete, manner. From the reviews of the first edition: 'In his fascinating book *Spinning Flight*, Ralph Lorenz provides a rich feast of ... examples of spinning bodies The book is well organized The discussion in the book ... should be accessible to readers with some elementary understanding of aerodynamic principles. For the expert, the book is full of open problems Its scope is extensive In this respect, there may be something for everyone within its attractively designed cover' (H. K. Moffatt, *Nature*, Vol. 444, December, 2006) 'If you liked physics at school, then this book is for you. It concerns itself with flying objects that spin through the air, and even tells you how to impress your friends with the biomechanics of Frisbees. ... there is plenty of information at all levels, and the book has a wealth of detail that only an aerospace engineer like Lorenz could have come up with.' (Len Fisher, *BBC Focus*, February, 2007)

From reader reviews:

Mark Giordano:

With other case, little individuals like to read book Spinning Flight. You can choose the best book if you love reading a book. Provided that we know about how is important a book Spinning Flight. You can add understanding and of course you can around the world by a book. Absolutely right, since from book you can know everything! From your country until eventually foreign or abroad you will be known. About simple point until wonderful thing you could know that. In this era, we can easily open a book or perhaps searching by internet product. It is called e-book. You can utilize it when you feel bored to go to the library. Let's learn.

Gary Kruse:

Reading can called mind hangout, why? Because when you find yourself reading a book mainly book entitled Spinning Flight your mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely might be your mind friends. Imaging just about every word written in a publication then become one web form conclusion and explanation that will maybe you never get ahead of. The Spinning Flight giving you another experience more than blown away your thoughts but also giving you useful info for your better life with this era. So now let us teach you the relaxing pattern this is your body and mind are going to be pleased when you are finished studying it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

Susan Jun:

As we know that book is significant thing to add our information for everything. By a e-book we can know everything we really wish for. A book is a set of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This reserve Spinning Flight was filled concerning science. Spend your spare time to add your knowledge about your scientific research competence. Some people has various feel when they reading a book. If you know how big advantage of a book, you can really feel enjoy to read a e-book. In the modern era like at this point, many ways to get book that you simply wanted.

Kristen Wright:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher with their students. Many kinds of hobby, All people has different hobby. And also you know that little person including reading or as examining become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You see good news or update regarding something by book. Amount types of books that can you choose to use be your object. One of them are these claims Spinning Flight.
