Archaeology in Hertfordshire: Recent Research

Archaeology in Hertfordshire: Recent Research

Celebrating the rich heritage of archaeology and of archaeological research in Hertfordshire, the 15 papers collected in this work focus on various aspects of the region, including the Neolithic to the post-Medieval periods, and include a report on the important excavations at the formative henge at Norton. Several chapters focus new attention on the Iron Age and Roman periods, both from a landscape perspective and through detailed studies of artefacts, while a discussion of the rare early Saxon material recently excavated at Watton at Stone makes a vital contribution to the existing corpus of knowledge about this little-understood period. All of the papers in the volume focus on the local scene with an understanding of wider issues in each period and as a result, the papers are of importance beyond the boundaries of the county and will be of interest to scholars with wide-ranging interests.
