**The Ecology of Fungal Entomopathogens** Helen E. Roy, Fernando E. Vega, Mark S. Goettel, Dave Chandler, Judith K. Pell, Eric Wajnberg

Understanding of the ecology of fungal entomopathogens has vastly increased since the early 1800's, but remains challenging. The often complex interactions between pathogen and host are being unravelled through eloquent research and the importance of the often subtle interactions, in determining the success or failure of biological control, cannot be underplayed. The realm of ecology is vast and deciphering insect-fungal pathogen interactions within an ecological context will take us on voyages beyond our imagination. This book brings together the work of renowned scientists to provide a synthesis of recent research on the ecology of fungal entomopathogens exploring host-pathogen dynamics from the context of biological control and beyond.

Dr. Helen Roy leads zoological research in the Biological Records Centre at the NERC Centre for Ecology & Hydrology, UK. The focus of her research is insect community interactions with particular emphasis on the effects of environmental change. She has been working on the ecological interactions between fungal entomopathogens and their hosts for 15 years; this continues to be a source of fascination. She has been an associate editor of *BioControl* since 2006.

Dr. Dave Chandler is an insect pathologist at the University of Warwick, UK. He has studied entomopathogenic fungi for just over 20 years. He has particular interests in entomopathogenic fungi as biocontrol agents of horticultural crops, fungal physiology and ecology, and the pathogens of honeybees.

Dr. Mark Goettel is an insect pathologist at the Lethbridge Research Centre of Agriculture & Agri-Food Canada, specializing in the development of fungal entomopathogens as microbial control agents of insects. In addition to this research, he has been extensively involved in the review and revision of the regulations for registration of microbial control agents and has addressed regulatory and safety issues at the international level. He is currently President of the Society for Invertebrate Pathology and has been Editor-in-Chief of *Biocontrol Science & Technology* since 2000.

Dr. Judith K. Pell heads the Insect Pathology Group in the Department for Plant and Invertebrate Ecology at Rothamsted Research, UK. She leads research on the ecology of fungal entomopathogens, to elucidate their role in population regulation and community structure and to inform biological control strategies. Specifically: intraguild interactions; the relationships between guild diversity, habitat diversity and ecosystem function; pathogen-induced host behavioural change.

Dr. Eric Wajnberg is a population biologist specialising in behavioural ecology, statistical modelling and population genetics. He is also an expert in biological control, with more than 20 years experience of working with insect parasitoids. He has been the Editor in Chief of *BioControl* since 2006.

Dr. Fernando E. Vega is an entomologist with the United States Department of Agriculture, Agricultural Research Service, in Beltsville, Maryland, USA. He conducts research on biological methods to control the coffee berry borer, the most important insect pest of coffee throughout the world. He is co-editor, with Meredith Blackwell, of *Insect-Fungal Associations: Ecology and Evolution*, published by Oxford University Press in 2005, and serves as an Editorial Board Member for *Fungal Ecology*.

**From reader reviews:**

**Manuel Coury:**

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim or perhaps goal; it means that publication has different type. Some people sense enjoy to spend their time to read a book. They are reading whatever they take because their hobby is actually reading a book. Think about the person who don't like reading through a book? Sometime, person feel need book if they found difficult problem as well as exercise. Well, probably you will require this The Ecology of Fungal Entomopathogens.

**Ines Patterson:**

The particular book The Ecology of Fungal Entomopathogens will bring you to definitely the new experience of reading the book. The author style to explain the idea is very unique. In the event you try to find new book to learn, this book very suitable to you. The book The Ecology of Fungal Entomopathogens is much recommended to you to read. You can also get the e-book from the official web site, so you can quickly to read the book.

**Tina West:**

Spent a free a chance to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their own friends. Usually they doing activity like watching television, planning to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the guide untitled The Ecology of Fungal Entomopathogens can be excellent book to read. May be it might be best activity to you.

**Desiree Herdon:**

The reason? Because this The Ecology of Fungal Entomopathogens is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will shock you with the secret it inside. Reading this book close to it was fantastic author who else write the book in such awesome way makes the content interior easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of benefits than the other book possess such as help improving your skill and your critical thinking means. So , still want to hold off having that book? If I have been you I will go to the publication store hurriedly.
