This book focuses on three emerging research topics in mobile social networks (MSNs): privacy-preserving profile matching (PPM) protocols, privacy-preserving cooperative data forwarding (PDF) protocols, and trustworthy service evaluation (TSE) systems. The PPM helps two users compare their personal profiles without disclosing the profiles. The PDF helps users forward data to their friends via multiple cooperative relay peers while preserving their identity and location privacy. The TSE enables users to locally share service reviews on the vendors such that users receive more valuable information about the services not only from vendors but also from their trusted social friends. The authors address both theoretic and practical aspects of these topics by introducing the system model, reviewing the related works, and presenting the solutions. Security and Privacy for Mobile Social Networks further provides the security analysis and the performance evaluation based on real-trace simulations. It also summarizes the future research directions for this rapidly growing area of research. The book will be valuable for researchers and practitioners who work with mobile social networks, communication platforms, wireless communication techniques, and internet applications.

"Suitable for any type of reader as an introduction to the topic... The chapters are well motivated and presented... It is recommended for researchers." -ACM Computing Reviews, 21 July 2014

**From reader reviews:**

**Robert Stewart:**

As people who live in the particular modest era should be change about what going on or info even knowledge to make these individuals keep up with the era which is always change and move ahead. Some of you maybe can update themselves by reading books. It is a good choice for yourself but the problems coming to an individual is you don't know which you should start with. This Security and Privacy in Mobile Social Networks (SpringerBriefs in Computer Science) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

**Helen Kingsbury:**

Reading a book can be one of a lot of pastime that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new information. When you read a e-book you will get new information mainly because book is one of a number of ways to share the information or perhaps their idea. Second, examining a book will make an individual more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the people do it anything. Third, it is possible to share your knowledge to some others. When you read this Security and Privacy in Mobile Social Networks (SpringerBriefs in Computer Science), you could tells your family, friends along with soon about yours publication. Your knowledge can inspire average, make them reading a reserve.

**Carl Vincent:**

The book untitled Security and Privacy in Mobile Social Networks (SpringerBriefs in Computer Science) contain a lot of information on the idea. The writer explains the woman idea with easy way. The language is very simple to implement all the people, so do certainly not worry, you can easy to read the idea. The book was authored by famous author. The author provides you in the new age of literary works. You can read this book because you can please read on your smart phone, or program, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice learn.

**Delores Villarreal:**

As a student exactly feel bored to be able to reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just tiny students that has reading's soul or real their pastime. They just do what the educator want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Security and Privacy in Mobile Social Networks (SpringerBriefs in Computer

Science) can make you sense more interested to read.
