Sir Arthur Newsholme

The Prevention of Tuberculosis (Routledge Revivals) Sir Arthur Newsholme

First published in 1908, this book presents a study of tuberculosis. It looks first at its causes, before examining how the problem of mortality from illness had already been reduced. The third part of the book then focuses on measures for reducing and annihilating tuberculosis altogether. Being written in the earlier years of the twentieth century, the book will not only be of interest to medical students and practitioners, but also to historians.
