## Creating Scientific Concepts (MIT Press) Nancy J Nersessian

How do novel scientific concepts arise? In *Creating Scientific Concepts*, Nancy Nersessian seeks to answer this central but virtually unasked question in the problem of conceptual change. She argues that the popular image of novel concepts and profound insight bursting forth in a blinding flash of inspiration is mistaken. Instead, novel concepts are shown to arise out of the interplay of three factors: an attempt to solve specific problems; the use of conceptual, analytical, and material resources provided by the cognitive-social-cultural context of the problem; and dynamic processes of reasoning that extend ordinary cognition. Focusing on the third factor, Nersessian draws on cognitive science research and historical accounts of scientific practices to show how scientific and ordinary cognition lie on a continuum, and how problem-solving practices in one illuminate practices in the other. Her investigations of scientific practices show conceptual change as deriving from the use of analogies, imagistic representations, and thought experiments, integrated with experimental investigations and mathematical analyses. She presents a view of constructed models as hybrid objects, serving as intermediaries between targets and analogical sources in bootstrapping processes. Extending these results, she argues that these complex cognitive operations and structures are not mere aids to discovery, but that together they constitute a powerful form of reasoning -- model-based reasoning -- that generates novelty. This new approach to mental modeling and analogy, together with Nersessian's cognitive-historical approach, make *Creating Scientific Concepts* equally valuable to cognitive science and philosophy of science.

### **From reader reviews:**

#### **Jessie Lloyd:**

This Creating Scientific Concepts (MIT Press) book is not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is usually information inside this reserve incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This specific Creating Scientific Concepts (MIT Press) without we recognize teach the one who reading it become critical in pondering and analyzing. Don't possibly be worry Creating Scientific Concepts (MIT Press) can bring once you are and not make your bag space or bookshelves' come to be full because you can have it in your lovely laptop even cell phone. This Creating Scientific Concepts (MIT Press) having very good arrangement in word and layout, so you will not sense uninterested in reading.

#### **Sally McGarvey:**

Often the book Creating Scientific Concepts (MIT Press) will bring someone to the new experience of reading the book. The author style to clarify the idea is very unique. When you try to find new book to see, this book very suitable to you. The book Creating Scientific Concepts (MIT Press) is much recommended to you to learn. You can also get the e-book through the official web site, so you can easier to read the book.

#### **Vanessa Gilliam:**

People live in this new day of lifestyle always try to and must have the extra time or they will get lot of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely sure. People is human not a robot. Then we ask again, what kind of activity do you possess when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative within spending your spare time, the book you have read is actually Creating Scientific Concepts (MIT Press).

#### **Evelyn Rogers:**

Do you like reading a book? Confuse to looking for your chosen book? Or your book was rare? Why so many problem for the book? But just about any people feel that they enjoy to get reading. Some people likes looking at, not only science book but additionally novel and Creating Scientific Concepts (MIT Press) or maybe others sources were given know-how for you. After you know how the good a book, you feel desire to read more and more. Science reserve was created for teacher or even students especially. Those textbooks are helping them to add their knowledge. In different case, beside science guide, any other book likes Creating Scientific Concepts (MIT Press) to make your spare time far more colorful. Many types of book like this one.
