Geothermal energy in the state Brandenburg Sandra Gerlach

Bachelor Thesis from the year 2004 in the subject Environmental Sciences, grade: 2.0 (B), Brandenburg Technical University Cottbus, language: English, abstract: Worldwide the demand in energy is increasing continuously. The awareness that fossil energy resources are limited and the fluctuation of crude oil- and natural gas prices were leading internationally and nationally to the recognition of geothermal energy as a possible energy source among the renewable energies (Rummel et al., 1993).

Geothermal energy is the heat of the earth. According to technical applications geothermal energy can be classified into three different natural systems, the shallow geothermal system, the hydrothermal low or high pressure systems and the hot dry rock system. These three systems of geothermal energy are described according to their possibilities of technical application. Legal requirements are playing a significant role in the application of geothermal energy as well as the political situation with regard to energy politics in the different states of Germany.

Special attention is given to the state Brandenburg. At first the geologic conditions have to be outlined. From the geologic conditions and the energy political situation as well as the supply and demand structure in Brandenburg, the potential for the use of geothermal energy is arising. Applications of geothermal energy started in the beginning of the 20th century in Brandenburg are in form of thermal springs. In the second half of the 20th century the use in Brandenburg turned to the utilization of shallow geothermal energy and later to deep geothermal energy projects. Today mainly the shallow geothermal energy systems are used commercially because they are economically wise in contrast to deep geothermal energy systems which can not be used economically wise yet. Their technology is still under development. Current projects will show their stage of development.

From reader reviews:

Linda Caron:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a go walking, shopping, or went to typically the Mall. How about open or read a book eligible Geothermal energy in the state Brandenburg? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

Josefina Smith:

This book untitled Geothermal energy in the state Brandenburg to be one of several books in which best seller in this year, that's because when you read this reserve you can get a lot of benefit into it. You will easily to buy this kind of book in the book shop or you can order it by using online. The publisher on this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Smartphone. So there is no reason to your account to past this e-book from your list.

Casey Schnell:

The actual book Geothermal energy in the state Brandenburg has a lot of information on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. This articles author makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

Gary Carter:

Your reading 6th sense will not betray you, why because this Geothermal energy in the state Brandenburg publication written by well-known writer who knows well how to make book that may be understand by anyone who read the book. Written in good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still hesitation Geothermal energy in the state Brandenburg as good book but not only by the cover but also from the content. This is one book that can break don't assess book by its protect, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.
